Belgium	Greece	Norway	Spain
Brazil	Guatemala	Oman	Sweden
Canada	Hong Kong, China	Panama	Switzerland
Chile	Hungary	Poland	Turkey
China	India	Portugal	Ukraine
Costa Rica	Ireland	Puerto Rico	United Arab Emirates
Cyprus	Israel	Qatar	United Kingdom
Czech Republic	Italy	Russia	United States
Denmark	Japan	Saudi Arabia	
Egypt	Lebanon	Singapore	

Countries making use of localizations

Customers in more than 120 countries use localization of other countries, own customization, or a partner solution.

Supported system languages (28):*

Arabic, Chinese (simplified and traditional), Czech, Danish, Dutch, English (UK and U.S.), Finnish, French, German, Greek, Hebrew, Hungarian, Italian, Japanese, Korean, Norwegian, Polish, Portuguese (Brazil), Portuguese, Russian, Slovak, Spanish (Latin America), Spanish, Swedish, Turkish, and Ukrainian

*A convenient option for making additional languages available is using a partner solution (for some countries bundled with functional add-ons) or to define customer-specific UI terms using the custom language tool as detailed in SAP Note [1757764](#).

2

Real-Time Insights

- In today's fast-paced business landscape, having timely and accurate information is crucial. SAP Business One empowers you with real-time insights into every aspect of your business.
- From sales trends and inventory levels to customer behavior and financial performance, you'll have **the data you need to make informed decisions quickly.**
- Harness the power of data-driven decision-making.

SAP Business One, Web Client Analytics

Streamline Business Processes with Analytics

- SAP Business One Web Client Analytics empowers the user in a simple approachable way
- Comprehensive off-the-shelf business process modelling
- Enables the user to simply build screens to fill most missing Micro Business Process steps

SAP Business One, Web Client Analytics

Powerful analytics at the tip of your fingers

List view: Object-centered analytics

Use sophisticated filtering (including date offset) and visualization (including date aggregation) capabilities for deriving and presenting the data you need in every object list view

General overview: Gather multiple data sources

Design cards based on any list view, analytical chart, user-defined object (UDO), user-defined table (UDT), or user-defined query (UDQ), showing the data you need from various aspects

User-defined queries

Manage, create, edit, and preview UDQs; presented as standard list view and can be leveraged as a data source for cards on general overview

Linked views: Contextual analytics

Assign any view, general overview, or UDQ to any object header and line level to derive record-specific data

Export and import views: Collaborate across companies

Export selected views (and links) to a file that can be imported into other company databases

Share by e-mail: Collaborate among users

Embed a direct link to any view, general overview, or UDQ in e-mail body and send to your colleagues

The screenshot displays the SAP Business One Web Client Analytics interface, featuring several analytical views and data tables:

- My Open Sales Invoices:** A list view showing sales invoices with columns for Document No., Customer Code, Customer Name, Posting Date, Due Date, Document Total, and Status. An example entry is shown for Document No. 1063, Customer Code >TestBP1, and Customer Name TestBP1.
- Standard:** A general overview section with three charts:
 - Invoice Totals by Month:** A line chart showing monthly invoice totals from 2006Q1 to 2008Q1, with values ranging from -200K to 1M.
 - Open Opportunity Value:** A stacked bar chart showing open opportunity values by quarter, with values ranging from 0 to 500K.
 - Sales Order Intensity:** A bar chart showing sales order intensity by quarter, with values ranging from 0 to 500K.
- User-Defined Query Top Sales Orders:** A configuration screen for a user-defined query named "Top Sales Orders". It includes fields for Name, Category, SQL Statement (containing "select * from ORDR"), and Active status. The SQL statement is: `select * from ORDR`.
- Columns:** A table showing the configuration of columns for the "Top Sales Orders" query. It includes columns for #, Name, Description, Type, Aggregation, Decimal Places, Link To, Match Unique ID With, and Original. The columns listed are DocEntry, DocNum, DocType, and CANCELED.

3

Streamlined Processes

- Say goodbye to manual tasks and redundant workflows. **SAP Business One automates and streamlines your core processes**, eliminating inefficiencies and improving productivity.
- From automating purchase orders and invoicing to optimizing inventory levels and tracking deliveries, you'll experience newfound operational efficiency, reduced errors, and ultimately, happier customers.

SAP Build

Create enterprise apps, automate processes, design business sites with drag-and-drop simplicity

Integrate smoothly
Collaborate securely

SAP Business Technology Platform

SAP Business Technology Platform brings together application development, data and analytics, integration, and AI capabilities into one unified environment optimized for SAP applications.

Artificial intelligence and automation

Extensibility readiness for adoption of AI services

Artificial intelligence: AI services and tools from SAP

- **Document Information Extraction** service and available integration to SAP Business One—SAP AI Service running on SAP BTP and leveraging machine learning to streamline processing of invoices from vendors
- **SAP Build Process Automation**—a solution helping customers maintain their edge and free employees from repetitive and error-prone tasks (seven automation best-practice templates available to be used with SAP Business One)
- **AI Foundation on SAP BTP**—a complete set of services for AI developers to build robust AI-driven extensions and applications

Artificial intelligence: Solutions from SAP partners

- SAP Business One extensibility is ready for adoption of AI services—enabling partners to create and innovate with AI services and most recent AI agents and develop own extensions and applications leveraging the latest generative AI technology.
- Partners are making use of SAP BTP tools for the solution development.
- Each customer has the freedom to choose the appropriate solution to meet that customer's needs.

4

Scalable and Flexible

- SAP Business One grows with your business. Whether you're adding new users, expanding to new markets, or introducing additional functionalities, **the system effortlessly adapts to your evolving needs.**
- With SAP Business One, you have the flexibility to customize the solution to fit your unique business processes, ensuring that you always have the right tools at your fingertips.

SAP Business One solution

Cost

- 9** Low cost of ownership and efficient support + cloud control center
